## **DIMPLE REMOVER, TUMMY SMOOTHER**

Cellulite is the scourge of the modern woman. Luckily, many effective noninvasive devices are available to combat the “cottage cheese” associated with jiggly thighs and buttocks. BodyFX by InMode combines a three-part technology to smooth and contour cellulite-ridden areas. Using a combination of vacuum suction, radio frequencies, and high efficiency laser pulses, BodyFX penetrates deeper levels of fat and smooths unsightly contours and dimpling. FDA trials have shown positive response in 100-percent of patient participants, with a 68-percent improvement in cellulite based concerns on a series of six treatments. Cottage cheese is now officially off the menu.
