

# Britney Spears Learning More About BodyFX

Spears was seen researching non-invasive aesthetic treatments, one of which is BodyFX, by InMode.

BodyFX is a new, long lasting, non-invasive solution to reduce the unsightly appearance of cellulite leading to improvements in your body contour. BodyFX uses a combination of different clinically proven modalities including radiofrequency energy, deep tissue heating and suction coupled negative pressure. The radio-frequency energy distributes heat to the skin and underlying fat, causing the tissues to heat and contract. The vacuum and controlled energy that pulses then work synergistically to provide beautiful body contouring and apoptosis results.

**BODY CONTOURING AND CELLULITE TREATMENT**

Discover a superior solution to improve the appearance of cellulite, reduce dimpled skin, loss of elasticity on the abdomen, love handles, hips, thighs AND other areas that require fat reduction.

**WHAT IS BODYFX?**  
BodyFX is a non-invasive, non-surgical, non-dietary solution to reduce the unsightly appearance of cellulite and improve skin tone and elasticity. BodyFX uses a combination of different clinically proven modalities including radiofrequency energy, deep tissue heating and suction coupled negative pressure.

**HOW DOES BODYFX WORK?**  
BodyFX uses a combination of different clinically proven modalities including radiofrequency energy, deep tissue heating and suction coupled negative pressure.

**HOW MANY SESSIONS ARE REQUIRED?**  
A minimum of 1-3 sessions are recommended over an 8-week period. Results are visible after the first session and continue to improve over time.

**WHAT KIND OF POST-PROCEDURE CARE IS REQUIRED?**  
There is no downtime associated with BodyFX. You can return to your normal activities immediately after the procedure.
