Discover Younger Acting Skin

Overall smoother and brighter glow.

"My Forma treatments improved the look of my face without any pain or downtime. It is a great alternative to expensive procedures. I love the way my new face looks."
JANEL, FORMA CLIENT

WHAT AREAS CAN BE TREATED?
Forma can be used both on the face and body. Commonly treated areas on the face include forehead, crows feet, upper eyelids, lower eyelids, nasolabial folds, jowls, smile lines and neck. On the body, popular treatments consist of the arms (slat sleeves), abdomen and other areas that may need contraction.

HOW DOES FORMA WORK?
Forma was developed based on the clinical success of the proprietary A.C.E. (Acoustic, Control, Extend) technology. A.C.E. technology uses radio-frequency energy to target deep layers of the skin, with no area being under or over heated. This ensures maximum and consistent results.

IS FORMA FOR ME?
Forma is suitable for all skin types and is appropriate for individuals seeking a non-invasive and a natural looking approach to improvements in skin tone and texture irregularities. Patients have reported that their skin feels smoother and more defined with less wrinkles.

FORMA on Dr. Oz
The Forma smooths and tightens the skin to reduce fine lines and wrinkles, reversing the effects of aging and sun damage. It's completely painless and there is no downtime.

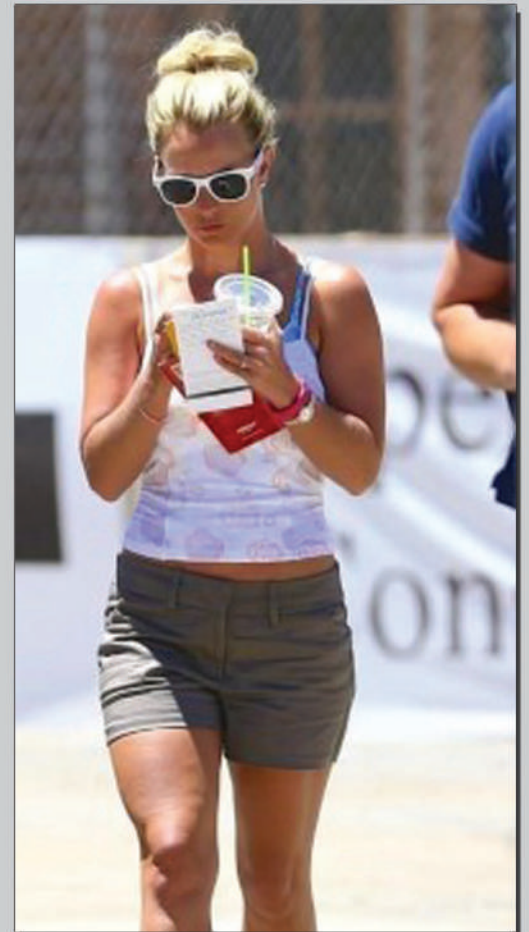

WILL IT HURT?
Forma is an essentially painless procedure with no downtime due to its precise technology and deep-layer targeting of the skin. Slight redness in the treatment area is common post-procedure, which subsides within a few hours.

HOW MANY SESSIONS ARE REQUIRED?
It is recommended that weekly sessions are performed over a six-week period. Individuals with mild laxity may be treated in fewer sessions with more weeks between each treatment. Scheduling should be based on a medical pre-evaluation.

CAN THIS BE USED IN COMBINATION WITH OTHER TREATMENTS?
Yes, Forma can be used in combination with most other laser treatments, facial, injectables and/or filler. Please speak to your aesthetic provider when considering combining Forma with other treatments.

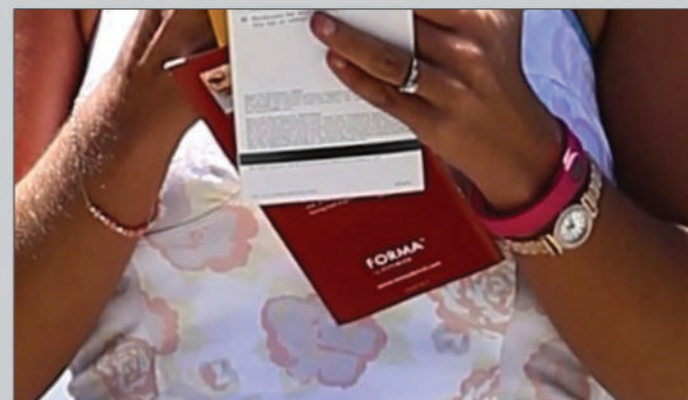

WHAT IS FRACTIONAL FACIAL?
Many Forma patients will combine Forma with Fractional Resurfacing and Camera Photofacial for a treatment series called Fractional Facial. Fractional Facial is the ultimate skin renovation treatment that addresses all-in-demand facial concerns including skin laxity, uneven skin tone, uneven skin texture, wrinkles and pigmentation.

Please speak to your aesthetic provider to see if you are a candidate.

Spears is on an upward beauty spiral; she looks better now than she did when she first came onto the scene, and her career has been solid for some time now. Spears was spotted in LA holding several pamphlets, one of which is Forma, by InMode.

Forma uses Radio-Frequency technology to help reduce the appearance of fine lines and to keep skin looking radiant. Forma is relatively pain-free and shows marked improvements after only a handful of treatments.
