

FORMA & BodyFX: EXTRA TV

January 4, 2015

Forma and BodyFX Featured on Extra TV as the Celebrity Secret for a Golden Globes Glow!

The secret is out! Extra TV reveals Forma & BodyFX as Hollywood's A-list celebrities' favorite non-invasive treatments. These treatments keep skin young, tight and glowing! In this video celebrity skin care facialist, Joanna Vargas, reveals her methods for getting Julianne Moore, Naomi Watts, Maggie Gyllenhaal and Bill Murray red carpet ready for the Golden Globes.

Forma uses non-invasive radiofrequency technology to rejuvenate skin and take years off the face. Forma smoothes crow's feet, tightens sagging skin on the jaw and neck, and diminishes fine lines and wrinkles. Results can be noticed after just

one session. The skin's elasticity continues to improve as the therapeutic temperature from the radiofrequency treatment stimulates the production of new collagen.

BodyFX is a non-invasive body contouring and cellulite treatment, using negative vacuum pressure and radiofrequency to reduce volume and simultaneously tighten skin. It can be used to tighten the abdomen, flanks, thighs and other trouble areas without surgery or downtime. Results are progressive and best seen after a series of treatment sessions.
